

The Premier Full-Text Resource for Engineering Research and Practice

Designed for engineering professionals and researchers of all types, this premier collection of indexed and full-text content provides information relevant to many engineering disciplines.

Vital Information for Engineering Professionals

Engineering Source provides unmatched indexing and full-text coverage for engineering journals, magazines and trade publications. Engineering-focused monographs, books, conference papers and proceedings are also included.

This resource is ideal for professionals at all levels of engineering, including research, planning, product development, management and supply chain.

Content Includes:

- Nearly 1,800 full-text publications
- Cover-to-cover indexing for nearly 3,000 publications

Covered Engineering Disciplines Include:

- Aerospace
- Biomedical
- Civil
- Electrical
- Environmental
- Mechanical
- Software
- Structural

EBSCO Discovery Service Takes Engineering Research to the Next Level

EBSCO Discovery Service (EDS) takes engineering research to the next level through a combination of content and technology taking into account all of the critical elements in the research process. EDS is the ideal platform for researchers and users of any level, including:

- Undergraduate students performing simple searches
- Post-graduate research conducting a sophisticated search
- Library administrators looking to quickly and conveniently streamline resources

Through a single search box, EDS provides fast, streamlined access to all of the library's content, but within the context of a greater experience that pulls together intuitive features and functionality, high-end indexing and instant access to critical full text.
